DEVESH MAGRE

Frontend Developer (React.js)

Pune, Maharashtra, India | +91-7089002451 | deveshmagre1@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Frontend Developer with 2.5+ years of hands-on experience building responsive, high-performance user interfaces with React.js, Redux Toolkit, TypeScript, and Tailwind CSS. Delivered real-time dashboards, role-based interfaces, and reusable components across IoT, logistics, and e-commerce products (SmartLock, E-Seal, LogiSmart, ProcMart). Skilled at using AI tools to build, debug, and ship faster. Comfortable integrating REST APIs and WebSockets and collaborating with design, QA, product, and backend teams in Agile environments.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3
Frontend: React.js, Redux Toolkit, Context API, React Hooks, Tailwind CSS, Material UI, Bootstrap, Responsive Design
API & Real-Time: REST API Integration, JWT Authentication (client-side), WebSockets, MQTT, Postman
Backend & Database: Node.js, Express.js, MongoDB, Mongoose, PostgreSQL (working knowledge)
Tools & Platforms: Git, GitHub, VS Code, Docker, AWS (EC2, S3), Nginx, Linux
AI Tools: Claude, ChatGPT, GitHub Copilot, Cursor – AI-assisted coding, debugging, code explanation, refactoring, and prompt engineering
Concepts: Component-Driven Development, State Management, Role-Based UI, Performance Optimization, Debugging, Agile/Scrum

PROFESSIONAL EXPERIENCE

Frontend-Focused MERN Developer – Aexonic Technologies

26 Feb 2025 – Present

Pune, Maharashtra, India

Project: SmartLock (IoT Smart Lock Management Platform)

- Built React.js modules for managing smart lock devices, users, and access permissions, with role-based views and protected routes.
- Implemented real-time device status updates and activity dashboards, improving monitoring speed by 45%.
- Integrated secure REST APIs (JWT authentication) for lock/unlock operations and access logs into the UI.

Project: E-Seal (Electronic Seal Tracking System)

- Designed and developed responsive dashboards for monitoring seal status, tamper alerts, and shipment events.
- Integrated device data and notifications to improve visibility and reporting for operations teams.
- Worked with backend APIs and schemas for seal event data, improving query performance by 30%.

Project: LogiSmart (Logistics & Fleet Management Platform)

- Built shipment tracking, trip management, and reporting screens using React.js and the MERN stack.
- Improved load times with API pagination and query indexing, boosting performance by 40%.
- Collaborated with QA, product, and hardware teams to deliver releases on schedule.

Frontend-Focused Software Developer (MERN) – Cubexo

Feb 2024 – Feb 2025

Indore, Madhya Pradesh, India

Project: ProcMart (Procurement E-Commerce Platform)

- Developed marketplace UI features including catalog, search, cart, and order management, improving order processing speed by 35%.
- Built reusable React components and integrated REST APIs, improving code reusability and maintainability.
- Implemented authentication flows, vendor/buyer role-based interfaces, and admin panel screens.
- Fixed bugs, wrote clean documented code, and participated in code reviews and sprint planning.

EDUCATION

B.Tech in Computer Science Engineering – Malwa Institute of Technology, Indore

2024

Indore, Madhya Pradesh, India | CGPA: 7.2

CERTIFICATIONS

- Namaste React – Namaste Dev (Akshay Saini)
